### PROJECT PROFILE: Insul-Tarp Pole Barn

#### Pleasant Plains, Illinois

Insul-Tarp Premium Under-Slab Insulation is designed for, but not limited to, radiant heating applications. In this issue, we explore an Insul-Tarp pole barn project in Pleasant Plains, Illinois.

After doing their research, Doug and Chassidy Houser decided radiant floor heat was the way to go in their 50' x 72' x 17' pole barn. The initial plan was to use 2" foam board. However, after measuring, they realized foam board would barely leave them room for a 4" concrete floor, especially not the 5" floor they desired. A friend pointed Doug and Chassidy in the direction of

Insul-Tarp Under-Slab Insulation to replace foam board in their pole barn radiant heating application. The pole barn space needed 3,600 square feet of Insul-Tarp (in various dimensions to fit the area), two rolls of polyethylene tape and several bags of Quip Clips.

Insul-Tarp was rolled out to cover the leveled floor. Doug mentioned how easy the rolls were to handle...even the 12' x 50' roll!

After joining the rolls together with 4" poly tape, it was time to install the wire mesh.

Once the wire mesh was installed, the Pex line needed to be attached.

The 1/2" pex tubing used was attached to the wire mesh using ISI's Quip Clips, spaced about three feet apart. The pole barn was ready for concrete.

Doug thought his pole barn project was quite simple, even with a one-man crew. He says the installation of Insul-Tarp will allow the concrete floor to be at least 5" thick and keep the barn warm all winter.

## TRADE SHOWS

### UPCOMING SHOWS

ICAA 2016  
Denver, Colorado  
Sept. 29 - Oct. 1  
[www.insulate.org](http://www.insulate.org)

IBS 2017  
Orlando, Florida  
Jan. 10 - 12  
[www.buildersshow.com](http://www.buildersshow.com)

WOC 2017  
Las Vegas, Nevada  
Jan. 17 - 20  
[www.worldofconcrete.com](http://www.worldofconcrete.com)

AHR 2017  
Las Vegas, Nevada  
Jan. 30 - Feb. 1  
[www.ahrexpo.com](http://www.ahrexpo.com)

INT'L ROOFING EXPO 2017  
Las Vegas, Nevada  
March 1 - 3

### CONSTRUCT SHOW 2016

Insulation Solutions recently exhibited at the 2016 Construct Show held in Austin, Texas, Sept. 8-9 at the Austin Convention Center.

At our specifically designed Viper booth, we displayed our Viper II High Performance Under-Slab Vapor Barrier line.

We hope you had the chance to visit and enjoy Austin with us! Check out the benefits of using an under-slab vapor barrier by visiting [www.viper2.com](http://www.viper2.com).

### Happy Anniversary, Jenni!

Jenni Hentchel celebrated 10 years with ISI on September 19th, 2016. Jenni is our Product Development Coordinator who organizes our trade shows, travel, events, supports the launching of new products and so much more. Jenni and Sam welcomed their first child, Bryson, on September 15th! We have big shoes to fill while Jenni is home with her family and cannot wait to see her smiling face back in the office! Thank you, Jenni, for your hard work and dedication.
