

Product Spotlight: RIDGEPRO™ Roof Ventilation Systems

Our RidgePro Roof Ventilation Systems offer efficient performance and energy savings! It is important to circulate the air within the attic in order to reduce moisture build-up and maximize airflow. In cold climates, the primary purpose of the ventilation system is to help avoid the formation of ice dams, which are created by melting snow, and also to vent moisture that moves from the living space up into the attic. In warmer climates, the purpose is to remove solar heated air from the attic and roof to reduce the home or building's cooling load and to relieve strain on the air conditioner. Roof ventilation systems work all year round to ventilate the attic for a more comfortable living environment.

BEST PRICE, GUARANTEED! *CALL FOR DETAILS!

TRURIDGE CONTINUOUS RIDGE VENT

A standard sectional ridge vent of time tested design and proven performance. Available in a configuration to suit your requirements and your budget.

- Polypropylene construction
- Removes excess heat & moisture
- Increases the life of your roof
- Pre-formed nail holes with self-contained nails
- Specifically designed with or without filter

Length: 48" NFA: 18"

*NFA=Net Free Area
This is the open area that exists for air to pass through. The NFA of your soffits should be equal to or greater than the ridge vent.

RIDGEROLL

A rigid, externally-baffled ridge vent that runs the entire length of the roof peak, blending into the roofline for a more attractive home. One of the most efficient systems you can install, available with or without internal weather filter.

- Approved for use with nail gun
- Sustainable building product
- Nearly invisible
- Maintains proper orientation of baffle
- Exceeds Department of Energy recommendations
- Meets all nationally recognized building codes

Length: 20" NFA: 12"

EASYFLO MESH ROLL RIDGE VENT

A mesh ridge vent on a roll that runs the entire length of the roof peak, blending into the roof line. EasyFlo is an efficient system and simple to install.

- Polypropylene construction
- Increases the life of your roof
- Made from nylon matrix technology
- Gun-nailable

Length: 20" NFA: 13.5"

► Sacks to Mats

Nu-Age Films are high performance polypropylene sheeting products used for many different vapor retarding and protective cover applications. We seem to be learning more about the versatility of Nu-Age Films every day. We wanted to include this amazing group called “Sacks to Mats” in our newsletter this month. Sacks to Mats was formed in Plattsburgh, Missouri in February 2015. A second group was formed in May 2015 in Horton, Kansas. They found an innovative way to use Nu-Age Films, along with plastic bags you would get from shopping at most stores, and created a way to make sleeping mats for the homeless. Over 500 plastic bags, along with strips of Nu-Age Films, make up each mat. The Nu-Age is located on the inside (and is the strength of the mat) while the cut up strips of plastic bags make up the outer part of the mat. Just one roll of Nu-Age is enough to make 24 mats! Sacks to Mats then takes the finished mats to nearby cities and they are distributed by groups that work with the homeless. It is so nice seeing a group of people helping out those less fortunate by donating their time and these awesome, strong mats! If you want to get in contact with the Sacks to Mats group, you can email gramanet@rainbowtel.net or kastayton@yahoo.com To learn more about Nu-Age Films, click [HERE](#).

► Happy 10 Year Anniversary, Chad!

On April 6th, 2016 we celebrated Chad Whittington’s 10 year company anniversary with Insulation Solutions. Chad is one of our Product Managers who handles many products, including our under-slab insulation and roofing product lines. He and his wife Joy have a five year old son, Lucas, who will start kindergarten this fall. They enjoy boating and being at the lake in their spare time. Chad is a great asset to our team and we enjoy having him at Insulation Solutions.

▶ INTEX Expo 2016 - New Orleans

Insulation Solutions exhibits in trade shows throughout the country all year. In April, we participated in the INTEX Expo, held in New Orleans at the famous Mercedes-Benz Superdome! We displayed many of our products, including our R-Wall Continuous Insulation panels. It was a fun experience for our staff because they got to be right on the field where the New Orleans Saints play their home NFL games. You can learn more about R-Wall by clicking [HERE](#).
